WHARF AND WAVE.

DIAMOND HEAD-July 16, 10 P. M. -Weather, thick; wind, light N.E. There were no arrivals yesterday. A COLD WATER PAINT The Lebus is expected to arrive

loaded down with passengers. The City of Peking is due today

on her way to San Francisco. The bark Albert will leave for San Francisco about the 29th inst.

load of copra.

The Anna and the J. D. Spreckels will take away all the sugar now stored at Kahului.

Charles L. Wight, President of Wilder's S. S. Company, left for the other islands yesterday. Purser McCombe of the Australia,

was a sick man on the trip down. He is feeling much better now. The steamer Saturn at San Francisco, has been chartered to load

salmon and barley for London. from Hongkong on May 29th, with a cargo of merchandise for this port.

The cruiser Charleston, now at Nagasaki, Japan, will remain at that place for two months, as she is in Laborers' Quarters. It is a thick paste

need of an overhauling. On June 8th there was launched at Geestemiinde, Germany, a steel five-masted sailing vessel for Messrs. F. Laiesz's (Hamburg) fleet. She was christened the Potosi. Her carrying capacity is 6000 tons and she is the largest sailing vessel at present afloat, of smaller dimensions.

A telegram from Portland was forwarded by the Australia to T. H. Davies & Company, requesting them to announce the expected arrival of the steamer Asloun. She will leave Portland, Oregon, on August 1st, and is expected here 7 days later on her way to Yokohama. No particulars were given. The steamer prob- the gallon. ably belongs to the Oregon Railway P. and B

& Navigation Company. The wages of deep-water sailors on fereign ships in this port have been raised to \$20 a month, and at a meeting of the Seamen's Landlords' Association held recently it was decided to raise the advance to \$50 a man. says the Call. The wages of sailors have been ranging from \$15 to \$17.50 a month for the last two years, and in that time it cost Jack from \$5 to \$7.50 to get a berth on board any

Fjeld, Norwegian ship, was burned at sea about March 1st. All the crew were saved and taken on board the British ship Centaur, Captain Isbis-

ter, which left San Francisco March 6th bound for Cork. The Fjeld was 2050 tons net register, built at Southampton, England, 1891, commanded by C. J. Neilsen and owned by A. Monsen of Tonsberg, Norway. She was loaded with coal and bound from Grimsby to San Diego.

LIGHTS AT SEA.

Testing Their Visibility Under Different Conditions.

Some interesting experiments have been made on the visibility of the electric light at sea by the Governments of the United States, Germany and the Netherlands. The word "visible" in the report on the tests means visible on a dark night with a clear atmosphere. The result of the experience of the German committee was that a white light of one candle power was visible 1.4 miles on a dark, resulted as follows: In very clear was plainly visible at one nautical mile; one of three candle-power at two miles; one of ten candle-power seen by the aid of a binocular at four miles; one of twenty-nine candle-power faintly at five miles, and one of thirty-three caudlepower plainly at five miles. On an exceptionally clear night a white light of 3.2 candle-power was readily distinguished at three miles: one of 5.6 candle-power, at four miles, and one of 17.2 candlepower at five miles. In the Dutch experiments the results were almost similar, but a sixteen candlepower light was plainly visible at five miles, For a green light the power required was two for one mile, fifteen for two miles, fifty-one for three miles and 106 for four miles. The results of tests with a red light were almost identical with those with green, but it was conclusively proved that a white light was by far the most easily seen.

Captain William Leavitt, of Portland, Me., an old skipper, has compiled from the records a list of all the full-rigged ships afloat now fly- The New and Fine Al Steel Steamship ing the Stars and Stripes, and he has found the aggregate number to

Of Interest to Managers of Plan-

A Model Plant is not complete without Electric Power, thus dispensing with small Engines.

Why not generate your power from one CENTRAL Station? One generator can furnish power to your Pumps, Centrifugals, Elevators, Plows, Railways and Hoists; also furnish light and power for a radius of from 15 to 20 miles.

Electric Power being used saves the

labor of hauling coal in your field, also

water, and does away with hihg priced engineers, and only have one engine to look after in your mill. Where water power is available, it costs nothing to generate Electric Power. THE HAWAHAN ELECTRIC COMPANY is now ready to furnish Electric Plants and Generators of all descriptions at short notice, and also has on hand a large stock of Wire, Chandeliers, and all

Electrical Goods. All orders will be given prompt attention, and estimates furnished for Lighting and Power Plants; also attention is given to House and Marine Wiring.

THEO. HOFFMANN

Manager.
